

## **Drug Testing Kits Available for Sale**

Through the efforts of the PFA, drug kits are available through the NPHS Office Manager's office.

- The 5-panel kit sells for \$7.00 and tests presence in the urine of any of the following major classes of drugs: opiates, THC (the active ingredient in marijuana), methamphetamines, and amphetamines plus benzodiazepines.
- The 6-panel kit (\$10.00) will test for all of the drugs in the 5-panel kits plus oxycodone.

Kits are simple to use at home; results are easy to read and reliable. Parents may purchase kits from the Office Manager's office; a telephone call ahead of time is recommended (498-3676, ext. 1007).
